Build Your Information Security Management System or Cyber Resilience Program In-house

Change the complexity of ISO 27001 implementation into opportunity for improving your cyber risk posture, including compliance to Personal Data Protection Act 2010

Malaysian Institute for Risk and Resilience

Puncak Nilam Management Services Sdn Bhd (1189447-D)

HRDCORP CLAIMABLE

Ensuring everyone to have confidence in your ability to protect customers' information is a significant challenge to any business

Information security, including cyber security as well as data governance and protection planning, is high on the agenda of many organizations. Through information security management, any malicious action, infrastructure failure. crypto viruses, DDoS attacks and other cyber risks may be managed from impacting the continuity of the organization.

PNMS offers face-to-face training and advisory workshops as well as post-training coaching support whereby your internal team will learn hands-on on how the components of ISO 27001 may be built effectively and unified with your existing business processes in managing risk of information security.

Being ISO 27001 certified is a trusted means to demonstrate that you have the knowledge, technology and processes in place to safeguard sensitive and critical information. You don't even need to be certified – demonstrating compliance to an international standard is good way to start!

It won't even cost you 6-figures, we promise. Through HRDC-claimable programs, we will tailor the implementation program according to your budget, timeline and level of readiness.
